NEPA Cumulative Impacts and Best Practices Workshop

This workshop is offered at
no cost and is targeted to
experienced Federal and
State NEPA practitioners
and managers. This is not
a beginning level course.

NEPA Cumulative Impacts and Best Practice

Midwest Natural Resources Group

The Midwest Natural Resources Group (MNRG), a consortium of Federal agencies in the Midwest, invites you to participate in a free, three-day workshop that will present successful methods used to evaluate cumulative impacts of Federal projects.

Workshop Dates:
July 19th-22nd

- You will learn about methods, how they can be applied, and how to evaluate their suitability to projects that are in your jurisdiction.
- You will come away with from this workshop with practical knowledge about impact assessment and best practices and how they can be implemented to enhance your agency's decision-making under NEPA.

Topics:

- Review of state-of-the-art methods for Cumulative Impacts Analysis
- Guidelines for selection of methods
- Discussion of the strengths and weakness of each method and suitable applications
- Case Studies: Application of methodologies to actual transportation and land management projects
- Overview of NEPA trends and case law
